NEW YORK HIGH SCHOOL STUDENTS GO ON STRIKE

Because the School Day Has Been Lengthened for Military Training.

New York, Oct. 11.—An increase this year from forty to eighty minutes in the school day to allow time for military training was given as the cause of a strike here today of a number of high school students. Miss Annie Lederer, who appeared as head of a students' committee before an administrative committee on public welfare, said six hundred students had struck today and that in all 4,000 students would refuse to attend their classes unless the system of military training is discontinued.

Outward evidence that a strike was in progress was a demonstration by about 150 boys students of the High School of Commerce who refused to attend classes this morning. The strikers paraded through several streets, then raided a moving picture theatre. Twelve were arrested and were reprimanded by a magistrate. The other returned to school this afternoon.

Dr. Walter R. McIntire, of Providence, has been appointed dental director of Rhode Island, under the dental section of the medical board of the council of national defense. He is the son of Rev. Walter M. McIntire, former pastor of the Federal Street Methodist Episcopal church, in New London, and who is well known to members of the denomination in Westerly, where he frequently supplied the pulpit of Grace Methodist church. Dr. McIntire was an early member of the Elks' company, New London, C. A. C. N. E. and was engaged in engineering work for a time at Fort Terry, and in 1901 was an alternate at West Point. He was graduated in 1906 from the University of Maryland and in 1913 was president of the Rhode Island Dental Society.

The work of the organization several thousand National Army men have had serious dental defects corrected before they went into combat. The Dental Section of the National Council of Defense has appointed a general dental director for each military section of the country and a director for each state. The dentists are asked to give at least one hour each day to the care of teeth of recruits needing immediate attention and blank forms have been prepared for the name of the man, exemption number and a dental chart, to be marked by the dentist with his name. These are mailed to the director of the state for tabulation and classification, which are in turn sent to the War Department.

The soldier-to-be must not receive this treatment until he is certified in full for service and all exemptions waived for denied.

The work in Rhode Island, according to Dr. McIntire, will be conducted under the auspices of the Rhode Island Dental Society, the State Board of Registration in Dentistry and the local units of the League of American Dentists.
